PRODUCT DESCRIPTION

LADIES ONLY

The Hera BC from Oceanic comes standard with all the features and durability required of a high-end women’s BC. The design also incorporates our patented Adjustable Positioning System, rugged yet lightweight materials, plenty of storage, and 30lb of integrated weights into what may be the most comfortable, best fitting BC you’ll ever wear.

The newly re-styled Hera BC from Oceanic is built from the ground up for the ladies and comes standard with all the features and durability required of a high-end BC. The design also incorporates our Patented Adjustable Positioning System, rugged yet lightweight materials, plenty of storage, and 30 lb of integrated weights into what may be the most comfortable, best fitting women’s BC ever.

TECHNOLOGY

You Asked For It

More than 300 female divers, instructors and Oceanic Dealers participated in a detailed survey to help develop the ultimate women’s-specific BC design. Time and time again, we heard what is lacking in today’s BCs designed for women: a BC that’s actually designed to fit you; not a scaled-down male BC. You’re looking for a BC that’s comfortable, contoured in all the right places, but one that doesn’t sacrifice features or functionality.

You want a BC that’s travel-friendly, yet rugged enough and packing the lift capacity required for daily local diving. And finally, you’re looking for something with a little style – preferably not just big swatches of pink or purple material. You ask for it – Oceanic delivers.

Patented Custom Fit Harness
Oceanic's patented Custom Fit Harness is standard equipment on the Hera. With multi-position shoulder straps and cummerbund, the Hera delivers individual comfort for women of all shapes and sizes.

Hybrid Bladder Design
The innovative design of the Hera allows the freedom of movement and other benefits you have come to expect from a rear-inflation BC. However, the unique wraparound design of the air cell provides you more lift than most BC's; as well as an improved, upright orientation when the BC is inflated on the surface.

Patented QuickLock® Release 4 (QLR4) Weight Integration System
Angled down slightly to aid self-loading, Oceanic's patented QLR4 Quick Lock & Release System keeps up to 20 lbs. of releasable weight in position and stable throughout the dive. The weight pouches are simple to load and easy to release when you want to. Best of all, our patented positive-lock system helps to ensure that they'll stay put.

Rear Weight Pockets
Located on the back of the BC on either side of the cylinder band. Provides greater integrated weight capacity and better attitude underwater. Carries up to 10 non-dumpable pounds.

Fadeless 1000 Denier Cordura® Construction
Exterior abrasion points are covered in our "Fadeless" 1000-denier Cordura – tough stuff that will hold up to years of extreme diving and keep that new look longer.

Optional Integrated Retractor / BC Knife System
Built-in retractor and Spinner BC Knife attachment points – perfect for streamlining gauges, lights and other essentials.

Reliant Integrated Inflator
Ergonomically designed to be functional and easy to use in any dive position, the Reliant Integrated Inflator provides a full range of airway exhaust/inflation control. Simply press a button to produce precise flow for trimming dive altitude or maximum flow for major changes in buoyancy. A large exhaust valve creates a flow rate higher than the inflation rate of the power inflator, improving diver control during ascents.

Patented Depth-Compensating Adjustable Cummerbund
Oceanic's patented depth compensating cummerbund is manufactured from a unique woven elastic material that eliminates the need to readjust as your suit compresses at depth. Oceanic's cummerbund offers up to 8″ of adjustment to fit a wide range of sizes. For additional customization, the cummerbund may be easily changed with another size.

Padded Backpack and Additional Lumbar Support
Extra heavy-duty padding provides comfort both above and below the surface without having to sacrifice the stability of a hard backpack.

Large Main Zippered Pockets
Zippered so they’re easy to get into. Enough room to store your Light, extra Shadow Mask, Pocket Snorkel, and more!

Optional Air XS 2 Alternate Inflator
The AIR XS combines the reliability, performance and durability of the SlimLine OCTOPUS and ALLIANCE INFLATOR into one very low profile, streamlined package. The regulator/inflator combination is as small as many BC inflators alone, with breathing performance superior to many stand-alone octopus regulators.

The AIR XS can be added to any existing Oceanic BC or may be purchased already installed on a new Oceanic BC for additional savings.

- Designed specifically for women divers
- Patented Adjustable Positioning System (A.P.S.) Track
- Adjustable depth-compensating cummerbund
- Pre-bent welded stainless steel D-rings
- Reinforced contoured shoulders
- QuickLock® Release 4 (QLR4) Integrated Weight System 20 lb plus dual 5 lb rear

Hera Size Chart

	HEIGHT	WEIGHT (KG)
XS	152 - 165cm	45 - 56.7kg
S	157 - 170cm	54.4 - 70.3kg
M	165 - 178cm	61 - 72kg
L	170 - 183cm	70 - 86kg

SPECS

FEATURES & FUNCTIONS	HERA BC
Type	HYBRID
Air Cell Material	FADELESS 500 DENIER NYLON

Shoulder Panel Material	FADELESS 1000 DENIER CORDURA®
Pocket Panel Material	FADELESS 1000 DENIER CORDURA®
Main Pockets / Closure	ZIPPER
Accessory Pockets / Closure	N/A
Max Dumpable Integrated Weight	9 kg
Max Non-Dumpable Rear Weight Pockets	5 kg
