OCEANIC MANTA RAY FINS

€159,00

INSPIRED BY NATURE

Inspired by the ocean’s most effortless swimmers, the Manta Ray fin was designed to replicate the bio-mechanics of marine animals. With advanced materials as strong as bone, Manta Ray provides maximum power, speed and efficiency while remaining lightweight and durable.

PRODUCT DESCRIPTION

INSPIRED BY NATURE
Inspired by the ocean’s most effortless swimmers, the Manta Ray fin was designed to replicate the bio-mechanics of marine animals. With advanced materials as strong as bone, Manta Ray provides maximum power, speed and efficiency while remaining lightweight and durable.

WHY MANTA RAY?

TECHNO-POLYMER BLADE

Advanced materials as strong as bone maximize power, speed and efficiency, while remaining extremely lightweight and durable.

POWER-X SYSTEM

By replicating the motion of the foot’s tendons and joints, revolutionary material optimizes propulsion by flexing during the downstroke and releasing stored energy prior to upstroke.

POWER CHANNEL

The flexible material simulates the skin’s elasticity by directing water flow off the back of the blade for increased thrust.
